

ALSTASAN HAND RUB

Alcohol based Hand Sanitizer

General Description

ALSTASAN HAND RUB serves as a rub-in hand disinfectant, instant skin disinfectant with broad-spectrum sustained antimicrobial action. It is effective against all types of pathogens, having a wide efficacy over microorganisms within 20 – 30 seconds of application.

Alcohol based Hand Sanitizer (ABHS) rapidly inhibits the infectious activities of microbial agents present on skin surfaces with contact basis. The alcohol present in the formulation directly attacks the cell wall of these microorganisms, rupturing them completely before charging into membrane wall and nucleus rendering them harmless. With a low boiling point, the exothermic reaction evaporates these chemical residues, taking away germs with them. Independent of water and towel, it provides a reliable and prolonged antimicrobial effect. With added emollients and moisturizers, it even enhances skin hydration.

Physicochemical Data

Attributes	UOM	Typical Value
Form	-	Clear liquid
Appearance	-	Slight Red
Odour	-	Pleasant Hexichlor type
pH (Neat)	-	7.0 – 8.0
Specific Gravity	-	0.82 – 0.90
Other Ingredients	-	Balance
Solubility	-	Soluble in water

The above data have been obtained in laboratory tests and are typical of the product. They do not however constitute sales specifications and should not be regarded as such.

Constituents

Alcohol 70% (v/v), Chlorhexidine Gluconate Solution 2.5% (w/v), added with emollients and moisturizers, permitted colour and perfume.

Key Features & Benefits

- Broad spectrum efficacy
- Rapid action
- Prolonged antiseptic effect
- Added moisturizers
- Skin friendly
- No antibiotic resistance
