

WE DON'T JUST CLEAN,
WE CARE.

CLEANING & HYGIENE CHEMICALS

FROM THE CHAIRMAN'S DESK

The name Chemtex depicts Chemical Technology Experts. Over the past 50 years, Chemtex has come a long way in contributing to the global speciality chemicals requirement. As a company, we are committed to the overall social and economic progress. Our rapid growth in the recent years is leading to a promising future.

Our vast range of chemicals cater to various industrial sectors. It is appropriate to say

'THERE IS A BIT OF CHEMTEX FOR EVERY INDUSTRY.'

R.G. Karnani
Founder Chairman

MISSION - GREEN

To lead the industry in delivering eco-friendly cleaning solutions that not only meet the highest standards of cleanliness but also safeguard the health of our communities and the integrity of our environment.

VISION - SUSTAINABILITY

To transform the landscape of cleaning products by championing innovations that prioritize sustainability, safety, and efficacy, envisioning a world where every clean contributes to a healthier planet.

ECO COMMITMENT

At Chemtex Speciality Ltd, our commitment transcends beyond product effectiveness; we are dedicated to caring for your skin, the environment, and all surfaces. We pledge to use only the safest, most sustainable ingredients, ensuring every aspect of our operations promotes wellbeing and ecological balance.

WE CARE FOR YOUR SKIN, ENVIRONMENT AND SURFACES

FOR YOUR SKIN

Our products are formulated with gentle, plant-derived surfactants and enzymes, minimizing the risk of skin irritation and allergies. We avoid harsh chemicals, prioritizing your health and comfort without compromising cleaning power.

FOR THE ENVIRONMENT

By incorporating biodegradable ingredients and reducing harmful emissions, we ensure that our products are not only effective but also environmentally responsible. Our commitment extends to minimizing our carbon footprint and enhancing the ecosystems where our products are used.

FOR SURFACES

Our cleaning agents are designed to be safe on a variety of surfaces, preventing corrosion or damage. Whether it's delicate fabrics or sturdy industrial machinery, we ensure that our products perform effectively while extending the life of your assets.

ARE YOU SURROUNDED BY TOXIC CHEMICALS?

Many conventional cleaning products contain ingredients that can be harmful to human health and the environment. For example

CHLORINATED HYDROCARBONS

Often found in degreasers and spot removers, these compounds can cause respiratory issues, skin irritation, and long-term organ damage.

PHENOLS

Used in disinfectants and toilet bowl cleaners, phenols are corrosive to the skin and can be toxic to internal organs if inhaled or ingested.

BUTYL CELLOSOLVE (ETHYLENE GLYCOL MONOBUTYL ETHER)

Common in window and multipurpose cleaners, this solvent can irritate mucous membranes and, with prolonged exposure, may harm the liver and kidneys.

KEY TOXINS IN CLEANING PRODUCTS TO AVOID

• **AMMONIA**

Common in polishing and glass cleaners, ammonia can severely irritate the eyes, skin, and lungs. Its environmental impact is also significant, harming wildlife and air quality.

• **FORMALDEHYDE**

Used as a preservative, formaldehyde is a known carcinogen that can cause allergic reactions, respiratory issues, and chronic health problems, including leukemia.

• **TRICLOSAN**

Previously favored in antibacterial products, triclosan disrupts hormonal functions and contributes to antibiotic-resistant bacteria, with detrimental effects on aquatic ecosystems.

OUR DIFFERENCE **PIONEERING GREEN CLEANING** **INNOVATIONS**

A COMMITMENT TO GREEN CHEMISTRY

At Chemtex Speciality Ltd, we are not just manufacturers of cleaning products; we are innovators of sustainable solutions. Our products are uniquely designed with green chemistries that incorporate green surfactants, non-toxic ingredients, and bioenzymes, setting new standards for eco-friendly cleaning.

BIOENZYMES: THE NATURAL CLEANERS

Bioenzymes are at the heart of our product efficacy. These biological catalysts accelerate chemical reactions necessary for cleaning, breaking down stains and odors at a molecular level without the use of harsh chemicals. This means they are not only effective but also safe for your home, your health, and the environment.

GREEN SURFACTANTS: GENTLE AND POWERFUL

Our green surfactants are derived from natural, renewable resources. Unlike conventional surfactants, they are fully biodegradable and gentle on the skin. They effectively remove dirt and grime without emitting harmful fumes or causing respiratory problems. This makes them ideal for use in enclosed spaces and sensitive environments, ensuring a clean that cares for health and air quality.

NON-TOXIC INGREDIENTS: SAFE FOR ALL; LD₅₀ > 1000mg/KG

We prioritize the safety of our customers and the planet by avoiding ingredients that are toxic or harmful. Our products do not contain ozone-depleting chemicals, safeguarding the ozone layer and preventing ultraviolet radiation from accelerating the greenhouse effect and global warming.

ECO-FRIENDLY AND HUMAN-FRIENDLY

Our commitment to non-toxic, biodegradable ingredients means our products are as friendly to the environment as they are to human health. By using Chemtex Speciality Ltd's cleaning solutions, you're choosing products that don't just preserve the material integrity of the cleaned surfaces but also contribute positively to global health and ecological balance.

CLEANING & HYGIENE

SOLUTIONS FOR ALL YOUR NEEDS

No matter what needs professional cleaning, Chemtex Specialty Limited is up to the challenge with confidence. Our effective and proven products are just one aspect of what sets us apart. We provide a variety of extra services to guarantee consistently outstanding results for you.

APPLICATION METHODS

Automatic Dishwasher

SUSTAINABILITY PRACTICES

Chemtex Speciality Limited, our commitment to sustainability is unwavering. We focus on three key initiatives: Ecology, Economy, and Evolve. By prioritizing decarbonization, pollution control, and GHG reduction, we are dedicated to a cleaner environment.

Our multidisciplinary team of experts in chemical science, environmental science, polymer science, data science, and engineering drive our research and development. We embrace innovative technologies like biotechnology and artificial intelligence to enhance our sustainability profile.

Chemtex is committed to meeting the expectations of our stakeholders and responding to climate change. Through continuous R&D and customized solutions, we lead the transition to sustainable practices, ensuring an indelible positive impact on the ecological, social, and economic environments.

CERTIFICATIONS & APPROVALS

HOUSEKEEPING

SURFACE CLEANER

Transform your surfaces with our comprehensive range of Surface Cleaners, engineered to remove dirt, dust, grime & spots efficiently. These specific surface cleaners offer a streak-free finish and dry out quickly, making it perfect for everyday use on countertops, appliances, and more. They enhance the look & feel of your surfaces, ensuring hygiene and pristine.

KEY FEATURES:

- Streak-free finish; Enhances surface appearance
- Quick-drying formula; Saves cleaning time
- Versatile use; Suitable for various surfaces
- Gentle on surfaces; Maintains surface quality
